Re: Neighbor (at 1170 El Medio) Trees Blocking Canyon Views

To whom it may concern:

Several months ago we sought the help of the HOA to resolve our neighbor's back yard trees along the property line that impede our canyon views.

Since that time, not only have the trees not been cut to allow views from our living area but they have grown more and additional trees were planted.

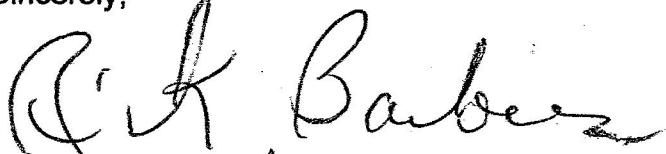

Because we have not been able to come to friendly terms with the neighbors, we are once again seeking help from the HOA. We have already asked the L.A. City Mediation Services to assist. We are aware that Ms. Gallagher was or is a member of the HOA and we are hopeful the HOA represents everyone in the HOA neighborhood and is fair and unbiased and does not show favoritism.

We would also like the HOA to be aware that these neighbors have been bullying us to repair a garden wall along their driveway that is visibly aging and not on our property. We are receiving increasingly intimidating and aggressive letters/notes from Mr. Gallagher that have presented deadlines and ultimatums.

We are aware of the lack of diversity in the neighborhood as well as in the HOA. We are also hopeful the Gallagher's attitude towards us is only theirs. We love this neighborhood and want to add to its beauty and value. We certainly do not plan to relocate but the Gallaghers have not made it easy for us to feel welcome.

At the very least, we appreciate the help of the HOA to resolve the trees blocking our canyon views. We are doing our best to resolve this without having to seek legal counsel

Sincerely,

Dr. Rick and Marisol Barbers
