Hi Kim,

Attached are the elevations you requested. I am also attaching an updated version of the Site Plan. We made a minor modification, but figured you'd like the most recent version.

Please note that while the height of the Observation Deck is 10'... from the finished ground of our original pad it is 15'5" and within the 15'6" maximum allowed.

Please let me know if you need anything else.  
Ilana
