FYI...see email from Dan Ray below. Should I distribute to the board? Chuck, for admin website.

Thanks.

Kim

KIM,

Thank you for letting us know about Chapin's plans. We were pretty much blind sided with this development. Could you let us know what variances have been granted and how they might affect us.

I also am quite astounded by the size of the planned structure and the need for parking up to eight cars/trucks. The size of the structure and the need for so much parking space suggests to me that the structure is intended to be much more than a residence. Is a business operation possibly planned in addition to a residence? Can we get assurance of that?

If there would be two trips per day per vehicle up and down our shared driveway that would amount to 32 transits on our driveway each day and would constitute a significant disturbance. The driveway is only a few feet from two of our bedrooms. Likewise once the project is initiated construction workers trucks and trucks hauling dirt away down our driveway would be an excessive disturbance to the tranquility that we enjoy at our home. While the driveway is shared with Chapin, the use during and after the construction would be excessive. Are there no laws that regulate such disturbance? Could he possibly construct a driveway down his back hillside?

Looking forward to meeting at 4 PM.

Oh, by the way, We are going to be out of town on March 20th. Could that meeting be postponed for a week to March 27th?

Thanks,

Dan Ray
