TO: Palisair HOA

Tuesday March 7

Due to prior commitments we were not able to attend Sunday's viewing and subsequent discussion of the remodel of the property at 1055 El Medio. However, we would like to strongly state our objection to the proposed scope of this project, which sits directly across the canyon from our home. The HOA has clearly and repeatedly defined "views" as encompassing not only ocean views but the integrity of all aspects of our residential environment, including architectural design, preservation of privacy, and other aesthetic considerations. In particular, greenery and trees are an essential component of our neighborhood. If this project were allowed to proceed at anything close to its proposed scope, our view would be denigrated from a serene hillside landscape to a looming and intrusive structure, and this aesthetic deterioration would be accompanied by a loss of privacy. We will be happy to discuss this issue further if needed with the appropriate people.
